Pregunta 1: Who starts the Daily Scrum? *(Una respuesta)*

The person coming in last. This encourages people to be on time and helps to stay within the time-box.

Whoever the Development Team decides should start.

The person who has the token.

The Scrum Master. This ensures that the Development Team has the meeting and stays within the time-box.

The person who last broke the build.

Pregunta 2: When can a Development Team cancel a Sprint? *(Una respuesta)*

When a technical dependency cannot be resolved.

When the selected Product Backlog items for the Sprint become unachievable.

When the Product Owner is absent too often.

It cannot. Only Product Owners can cancel Sprints.

When functional expectations are not well understood.

Pregunta 3: How should a Development Team deal with non-functional requirements? *(Una respuesta)*

Make sure the release department understands these requirements, but it is not the Development Team's responsibility.

Assign them to the lead developers on the team.

Handle them during the Integration Sprint preceding the Release Sprint.

Ensure every Increment meets them.

Pregunta 4: When many Scrum Teams are working on the same product, should all of their Increments be integrated every Sprint? *(Una respuesta)*

No, each Scrum Team stands alone.

Yes, but only for Scrum Teams whose work has dependencies.

Yes, otherwise the Product Owners (and stakeholders) may not be able to accurately inspect what is done.

No, that is far too hard and must be done in a hardening Sprint.

Pregunta 5: The Development Team should have all the skills needed to: (Choose the best answer.) *(Una respuesta)*

Turn Product Backlog items into an Increment of potentially releasable product functionality.

Do all of the development work, except for specialized testing that requires additional tools and environments?

Complete the project within the date and cost as calculated by the Product Owner.

Pregunta 6: Which output from Sprint Planning provides the Development Team with a target and overarching direction for the Sprint? *(Una respuesta)*

The Sprint Goal.

Sprint Review minutes.

The Sprint Backlog.

The release plan.

Pregunta 7: In the middle of the Sprint, the customer decides that there are two new features she wants. The Product Owner could: (Choose two.) *(Múltiples respuestas)*

Introduce these features at the next Daily Scrum.

Add these features to the Product Backlog.

Have the Scrum Master add these features to the current Sprint.

Ask the Developers to consider whether they can add these features to the current Sprint without endangering the Sprint Goal.

Pregunta 8: Who is required to attend the Daily Scrum? *(Una respuesta)*

The Development Team.

The Scrum team.

The Development Team and Scrum Master.

The Development Team and Product Owner.

The Scrum Master and Product Owner.

Pregunta 9: Which are properties of the Daily Scrum? (Choose two.) *(Múltiples respuestas)*

It is facilitated by the team lead.

It is held first thing in the morning.

It is fifteen minutes or less in duration.

It is free from and designed to promote conversation.

It consists of the Scrum Master asking the Team members the three questions.

It is location and time remain constant.

Pregunta 10: When the Developers determine that they will not be able to finish the complete forecast, who has to be present when reviewing and adjusting the Sprint work selected? (Choose the best answer.) *(Una respuesta)*

The Product Owner and all stakeholders.

The Scrum Master and the Developers.

The Scrum Master, project manager and the Developers.

The Product Owner and the Developers.

Pregunta 11: True or False: An Increment must be released to customers or users at the end of each Sprint. *(Una respuesta)*

True

False

Pregunta 12: A Product Backlog is: (Choose three.) *(Múltiples respuestas)*

Ordered based on priority, value, dependencies, and risk.

Only visible to the Product Owner and stakeholders.

An inventory of things to be done for the Product.

An exhaustive list of upfront approved requirements to be implemented.

Managed by the Product Owner.

Pregunta 13: Why does the Product Owner want the Developers to adhere to its Definition of Done? (Choose the best answer.) *(Una respuesta)*

To be able to reprimand the team when they do not meet their velocity goal for the Sprint.

To predict the team's productivity over time.

To have complete transparency into what has been done at the end of each Sprint.

To know what the team will deliver over the next three Sprints.

Pregunta 14: Which statement best describes the Sprint Backlog as the output of the Sprint Planning? (Choose the best answer.) *(Una respuesta)*

Every item has a designated owner.

It is ordered by the Product Owner.

Each task is estimated in hours.

It is the Developers plan for the Sprint.

It is a complete list of all work to be done in a Sprint.

Pregunta 15: Which is NOT a valid consideration when ordering a Product Backlog? (Choose the best answer.) *(Una respuesta)*

Importance to customers.

Tools and techniques.

Alignment with business strategy and goals.

Risk.

Dependencies on other Product Backlog items.

Pregunta 16: True or False: Product Owners must specify complete acceptance criteria for a Product Backlog item before the Developers can select the item in Sprint Planning. *(Una respuesta)*

True

False

Pregunta 17: A Product Owner is accountable for maximizing the value of the product that is the result of the Work of the Scrum Team. Which of the following can be delegated to others, while the Product Owner remains accountable for the work? (Choose two.) *(Múltiples respuestas)*

Attending the Sprint Retrospective.

Attending the Sprint Review.

Ordering Product Backlog items.

Developing and communicating the Product Goal.

Pregunta 18: True or False: All planned work for the Product done by the Scrum Team must originate from the Product Backlog. *(Una respuesta)*

True

False

Pregunta 19: Scrum requires that the Product Owner must use which of the following items? (Choose all that apply.) *(Múltiples respuestas)*

Burndown chart.

Feature bum-up.

Critical Path Analysis.

Project Gantt chart.

None of the above.

Pregunta 20: When must the Product Owner participate in the Daily Scrum? (Choose the best answer.) *(Una respuesta)*

When there are impediments to discuss.

When the Product Owner is actively working on items on the Sprint Backlog; however, they participate as a Developer.

When the Scrum Master asks the Product Owner to attend.

When the Product Owner needs to represent the stakeholders' point of view to the Developers.

Pregunta 21: Which metrics will help a Product Owner determine if a product is delivering value? (Choose two.) *(Múltiples respuestas)*

Productivity.

Time to market.

Velocity.

Percentage of scope implemented.

Customer satisfaction.

Pregunta 22: Every Scrum Team should have: (Choose the best answer.) *(Una respuesta)*

One Lead Developer and no more than 8 other members.

The competencies and skills needed to deliver an Increment in a Sprint.

At least one representative from each major department, such as, Quality Assurance, Development, and Marketing.

Pregunta 23: A product's success is measured by: (Choose three.) *(Múltiples respuestas)*

The impact on my performance rating.

The impact on revenue.

The impact on customer satisfaction.

The impact on cost.

The impact on my boss's mood.

The delivery of upfront defined scope compared to the upfront planned time.

Pregunta 24: Scrum is based on empiricism. All of its artifacts must be transparent to ensure sufficient accuracy of inspection. How can the Scrum Team maintain the Product Backlog to maximize its transparency? (Choose the best answer.) *(Una respuesta)*

Product Backlog items must be sized such that the highest ordered items are no bigger than a Sprint.

The Product Backlog is continually kept up to date with the most recent insights.

The Product Backlog is only updated at the Sprint Review, when both the Scrum Team and the stakeholders are available.

The Product Backlog is only updated at a release planning meeting with the stakeholders and the change control board present.

Product Backlog items should hold no more than 8 points of work, which is the average in the range of acceptable sizes of 1, 2, 3, 5, 8, and 13.

Pregunta 25: True or False: The Product Owner makes sure the correct stakeholders are invited to the Sprint Retrospective. They might have important instructions for team improvements. *(Una respuesta)*

True

False

Pregunta 26: Which of the following is an example of an Increment? (Choose the best answer.) *(Una respuesta)*

A plan for the overall product release.

A mock-up of the product marketing materials.

A design for the product.

A product roll-out plan.

A valuable, useful set of product features.

All of the above.

Pregunta 27: Which of the following are appropriate topics for discussion during a Sprint Retrospective? (Choose two.) *(Múltiples respuestas)*

How the team collaborates

The order of items in the Product Backlog

Documenting acceptance criteria for items in the next Sprint

Identifying high priority process improvements for the next Sprint

Pregunta 28: What is the main reason for the Scrum Master to be at the Daily Scrum? (Choose the best answer.) *(Una respuesta)*

They do not have to be there; they only need to ensure the Developers have a Daily Scrum.

To gather status and progress information to report to management.

To write down any changes to the Sprint Backlog, including adding new items, and tracking progress on the burn-down.

To make sure every team member answers the three questions.

Pregunta 29: Which of the following practices might help the Product Owner minimize waste in developing and sustaining the Product Backlog? (Choose two.) *(Múltiples respuestas)*

Avoid distracting the Scrum Team by maintaining newly gathered Product Backlog items in a separate Product Backlog until they are fully understood.

Remove items from the Product Backlog that have not been addressed in a longtime.

Hand off ownership of the Product Backlog to someone else.

Only fully describe Product Backlog items when it seems likely they will be implemented.

Pregunta 30: The Developers find out during the Sprint that they are not likely to build everything they forecast. What would you expect a Product Owner to do? (Choose the best answer.) *(Una respuesta)*

Change the Sprint Goal.

Skip Product Backlog refinement activities.

Re-work the selected Product Backlog items with the Developers to meet the Sprint Goal.

Cancel the Sprint.

Inform management that more Developers are needed.

Pregunta 31: The Daily Scrum is an event that happens every day. What would be three key concerns if the frequency were to be lowered to every two or three days? (Choose three.) *(Múltiples respuestas)*

Too much work is spent updating the Scrum board before the meeting.

The Product Owner cannot accurately report progress to the stakeholders.

Opportunities to inspect and adapt the Sprint Backlog are lost.

The Sprint Backlog may become inaccurate.

Impediments are raised and resolved more slowly.

The Scrum Master loses the ability to update the Gantt chart properly.

Pregunta 32: How often should customer satisfaction be measured? (Choose the best answer.) *(Una respuesta)*

Quarterly.

Frequently.

Daily.

Annually.

Pregunta 33: A Project Manager working with your Scrum Team has raised concerns about progress and money spent. What are the two best responses? (Choose two.) *(Múltiples respuestas)*

Have a discussion with the Project Manager; share the current impediments and forecast for the Sprint.

Scrum does not have Project Managers so disregard their concerns.

Show the Earned Value Analysis (EVA) report.

Share the last stakeholder briefing document prepared by the Product Owner.

Promote transparency by sharing the Product Backlog and ensuring the Project Manager has access.

Pregunta 34: Who is accountable for creating a valuable and usable Increment each Sprint? (Choose the best answer.) *(Una respuesta)*

The CEO.

The Scrum Master.

The Product Owner.

The Scrum Team.

The Developers.

Pregunta 35: Which two ways of creating Scrum Teams are consistent with Scrum's values? (Choose two.) *(Múltiples respuestas)*

Managers personally re-assign current subordinates to new teams.

The Chief Product Owner determines the new team structures and assignments.

Managers collaborate to assign individuals to specific teams.

Existing teams propose how they would like to go about organizing into the new structure.

Bring all the people together and let them organize into Scrum Teams.

Pregunta 36: Product Backlog. However, she is unsure about the purpose of the Product Backlog. She has read that the Product Backlog should be a list of all user

features for the product. She goes to the Scrum Master asking where to put the other types of requirements that are going to be taken into account. Are all of the following types of requirements acceptable on a Product Backlog? Stability requirements - Performance requirements - Product Functionality - Documentation - Fixes *(Una respuesta)*

Yes, they all belong on the Product Backlog. The Product Backlog is supposed to be the "single source of truth" for all the work for the product.

No. Product Backlog is a tool for the Product Owner. The Product Owner represents the users and stakeholders. Other types of requirements should be managed separately by the Developers. They are not the Product Owner's concern.

Pregunta 37: Why would you expect a Product Owner to care that the Scrum Team adheres to its Definition of Done? (Choose two.) *(Múltiples respuestas)*

The Product Owner should not concern themselves with meeting the Definition of Done, it is the Developer's responsibility.

To be able to punish the team when they do not meet their velocity goal for the Sprint.

To forecast the team's productivity over time.

To have complete transparency into what has been done at the end of each Sprint.

The Definition of Done can affect the product's total cost of ownership.

Pregunta 38: What does it mean for a Scrum Team to be cross-functional? (Choose the best answer.) *(Una respuesta)*

The Scrum Team is a virtual team drawing from separate teams of business analysts, architects, developers, and testers.

The Scrum Team includes skilled individuals who together have all the skills necessary to create value each Sprint.

The Scrum Team includes not only developers but also business analysts, architects, and testers.

Developers on the Scrum Team work closely with business analysts, architects, developers, and testers who are not on the team.

Pregunta 39: The Product Owner is the person who will be held accountable if a product does not achieve its goals or deliver value. Does this mean that the Product Owner has final say over the Definition of Done? (Choose the best answer.) *(Una respuesta)*

Yes, the Product Owner decides the Definition of Done. The Developers may be consulted.

No, the Scrum Team decides the Definition of Done, if it is not a standard of the organization. The Product Owner is just one member of the Scrum Team.

Pregunta 40: How much time must a Product Owner spend with the Developers? (Choose the best answer.) *(Una respuesta)*

40%, or more if the stakeholders agree.

Enough so that the Product Owner is confident the Increment will meet the intended value.

As much time as the Developers tell the Product Owner to be present.

100%

Pregunta 41: Which statement best describes the Sprint Review? (Choose the best answer.) *(Una respuesta)*

It is when the Scrum Team and stakeholders inspect the outcome of a Sprint and figure out what to do next.

It is used to congratulate the Developers if they complete their forecast or to punish the Developers if they fail to meet their forecast.

It is a demo at the end of the Sprint for everyone in the organization to check on the Work done.

It is a mechanism to control the Developers activities during a Sprint.

Pregunta 42: What happens if the Scrum Team cannot complete its work by the end of the Sprint? (Choose the best answer.) *(Una respuesta)*

The Sprints extended temporarily. Lessons are taken to ensure it does not happen again.

The Sprint is extended and future Sprints use this new duration.

The Sprint length is unchanged and the Scrum Team continuously leans and adapts.

Pregunta 43: True or False: When there are multiple teams working on one product, each Scrum Tea Should have a separate Product Owner. *(Una respuesta)*

True

False

Pregunta 44: What is the responsibility of the Product Owner in crafting the Sprint Goal? (Choose the best answer.) *(Una respuesta)*

The Product Owner defines the scope for a Sprint and therefore also the Sprint Goal.

The Product Owner must work with stakeholders to set each Sprint's Goal.

The Product Owner should come to Sprint Planning with a business objective in mind and work with the Developers to craft the Sprint Goal.

The Product Owner has no responsibility for the Sprint Goal. It is the sole responsibility of the Developers.

The Product Owner cannot attend Sprint Planning without having documented the Sprint Goal in advance.

Pregunta 45: All Scrum artifacts must be transparent to ensure sufficient accuracy of inspection. Which two measures ensure that the Product Backlog is transparent? (Choose two.) *(Múltiples respuestas)*

The Product Backlog only has work for the next 2 Sprints.

The Product Backlog is managed using a web-based tool.

The Product Backlog is ordered.

The Product Backlog is available to all stakeholders.

Each Product Backlog item has a MoSCoW priority.

Pregunta 46: What is the purpose of a Sprint Review? (Choose the best answer.) *(Una respuesta)*

To build team spirit.

To inspect the product Increment with the stakeholders and collect feedback on next steps.

To take time to judge the validity of the project.

To review the Scrum Team's activities and processes during the Sprint.

Pregunta 47: Which statement best describes a Product Owner's responsibility? (Choose the best answer.) *(Una respuesta)*

Keep stakeholders from distracting the Developers.

Ensuring that the work meets the commitments to the stakeholders.

Directing the Developers.

Maximizing the value of the work the Scrum Team does.

Pregunta 48: Which outcome is expected as a Scrum Team matures? (Choose the best answer.) *(Una respuesta)*

There will be no need for a time boxed Sprint.

They will improve their Definition of Done to include more stringent criteria.

The Sprint Retrospectives will grow to be longer than 4 hours.

A Scrum Master is no longer needed since they are a mature team now.

Sprint Reviews will no longer be needed.

Pregunta 49: True or False: Product Owners must create clear and unambiguous acceptance criteria for each Product Backlog item before it may be selected in Sprint Planning. *(Una respuesta)*

True

False

Pregunta 50: The job of a Product Owner focuses on the following: (Choose two.) *(Múltiples respuestas)*

Writing clear, transparent User Stories.

Clearly communicating project or release status and strategies to customers and stakeholders.

Working with customers and stakeholders to identify the most valuable product requirements.

Being with the Scrum Team all the time, just in case they need me to clarify a requirement.

Pregunta 51: Which of the following are criteria to order Product Backlog items? (Choose all that apply.) *(Múltiples respuestas)*

Value of Product Backlog items.

Dependencies between Product Backlog items.

Dependencies to other products.

The availability of the Scrum Master.

All of the above.

Pregunta 52: True or False: The Product Owner must write all of the Product Backlog items (e.g. user Stories, requirements, etc.) on the Product Backlog before handing them over to the Scrum Team. *(Una respuesta)*

True

False

Pregunta 53: The "cone of uncertainty" can be used to do what? (Choose the best answer.) *(Una respuesta)*

Determine whether to cut quality, similar to the "Iron Triangle" of project management.

Illustrate that as a project forecast lengthens, it is increasingly less certain.

Determine the cost of a project before it begins.

Determine the length of the next Sprint.

Pregunta 54: What are three advantages of a Product Owner sharing a clearly defined Product Goal with the Scrum Team? (Choose three.) *(Múltiples respuestas)*

It is not mandatory in Scrum. There is no real advantage.

It helps the Scrum Team keep focus and they can weigh any decision against the Product Goal.

It provides a good overall direction so Sprints will feel less like isolated pieces of work.

It is easier to inspect incremental progress at the Sprint Review.

It helps the Developers estimate the date that the Product Backlog will be complete.

Pregunta 55: Your management has asked you to take the lead in the development of a new product. Six teams new to Scrum will build this product. You have gathered a number of requirements and ideas into an early form of a Product Backlog. How would you minimize dependencies between the Scrum Teams? (Choose the best answer.) *(Una respuesta)*

You create an independent Product Backlog per Scrum Team.

You divide Product Backlog items among the six Product Owners.

You identify the dependencies and re-order the Product Backlog for the other five Product Owners.

You raise this as an impediment with the Scrum Master.

You work with the Developers on how to best analyze and break apart the work.

Pregunta 56: When should the Product Owner update the project plan? (Choose the best answer.) *(Una respuesta)*

The Product Backlog is the plan in Scrum. It is updated as new information and insights emerge.

The project plan must be updated prior to the Sprint Retrospective.

Before the Sprint Planning to know how much work will have to be done in the Sprint.

After the Daily Scrum to ensure an accurate daily overview of project progress.

Pregunta 57: True or False: Sprint Reviews are an opportunity to collect stakeholder feedback. *(Una respuesta)*

True

False

Pregunta 58: True or False: The value delivered by a product can only be determined by revenue. *(Una respuesta)*

True

False

Pregunta 59: Who is accountable for managing the progress of work during a Sprint? (Choose the best answer.) *(Una respuesta)*

The Product Owner.

The Developers.

The Scrum Master.

The most junior member of the team.

Pregunta 60: How much of the Sprint Backlog must be defined during the Sprint Planning event? (Choose the best answer.) *(Una respuesta)*

Enough so the Developers can create their forecast of what work they can do.

Just enough tasks for the Scrum Master to be confident in the Developers' understanding of the Sprint.

The entire Sprint Backlog must be identified and estimated by the end of Sprint Planning.

Just enough to understand design and architectural implications.

Pregunta 61: What three things might a Scrum Product Owner focus on to ensure the product delivers value? (Choose three.) *(Múltiples respuestas)*

Velocity is increasing over time.

Minimizing changes to project scope.

How quickly or easily the product can be absorbed and used by its customers.

How much of the functionality of the product is being used.

Direct customer feedback.

Pregunta 62: Which of the following are the Developers accountable for? (Choose two.) *(Múltiples respuestas)*

Selecting the Product Owner.

Organizing the work required to meet the Sprint Goal.

Creating a plan for the Sprint, the Sprint Backlog.

Reporting productivity.

Pregunta 63: Five new Scrum Teams have been created to build one product. A few of the Developers on One of the Scrum Teams ask the Scrum Master How to coordinate their work with the other teams. What should the Scrum Master do? (Choose the best answer.) *(Una respuesta)*

Teach the Product Owner to work with the lead developers on ordering Product Backlog in a way to avoid too much overlap during a Sprint.

Teach them that it is their responsibility to work with the other teams to create an integrated Increment that is inclusive of all five team's work.

Collect the Sprint tasks from the teams at the end of their Sprint Planning and merge that into a consolidated plan for the entire Sprint.

Visit the five teams each day to inspect that their Sprint Backlogs are aligned.

Pregunta 64: What typically happens if the Product Backlog is not sufficiently clear at Sprint Planning? (Choose the best answer.) *(Una respuesta)*

Sprint Planning is canceled so refinement can be done first.

The Scrum Master should not allow this to happen. Look for a new Scrum Master and restart the Sprint.

Nothing in particular.

The Product Owner should select the Sprint Goal for the Scrum Team so that work can begin.

The Developers will find it difficult to create a Sprint forecast they are confident they can meet.

Pregunta 65: What might indicate to a Product Owner that she needs to work more with the Scrum Team? (Choose the best answer.) *(Una respuesta)*

The acceptance criteria do not appear to be complete.

People leave the Scrum Team.

The Increment presented at the Sprint Review does not reflect what she thought she had asked for.

She is not working full time with the Scrum team.

Pregunta 66: What enhances the transparency of an Increment? (Choose the best answer.) *(Una respuesta)*

Updating Sprint tasks properly in the electronic tracking tool.

Keeping track of and estimating all undone work to be completed in a “hardening” Sprint.

Reporting Sprint progress to the stakeholders daily.

Doing all work needed to meet the Definition of Done.

Pregunta 67: True or False: A Product Owner should measure product value by the increase in the team's velocity. *(Una respuesta)*

True

False

Pregunta 68: Which of these may a Scrum Team deliver at the end of a Sprint? (Choose the best answer.) *(Una respuesta)*

Failing unit tests, to identify acceptance tests for the next Sprint.

A single document, if that is what management asked for.

An Increment of software with minor known bugs in it.

A valuable, useful Increment that meets the Definition of Done.

Pregunta 69: True or False: The Product Owner should have the entire Product Backlog documented in detail before the first Sprint can start? *(Una respuesta)*

True

False

Pregunta 70: In accordance with Scrum theory, how should a group of 100 people be divided into multiple Scrum Teams? (Choose the best answer.) *(Una respuesta)*

It does not really matter since you can rotate the teams every Sprint to spread knowledge.

Create a matrix of skills, seniority, and level of experience to assign people to teams.

Check with the allocation department to see who has worked together before and make these the first teams.

Understanding the product, the product vision and the rules of the Scrum framework, the people divide themselves into teams.

Pregunta 71: In order to maximize the value of the product, a Product Owner needs awareness of the following: (Choose the best answer.) *(Una respuesta)*

Competitive research.

Customer feedback.

Product vision.

Forecasting & feasibility.

All of the above.

None of the above.

Pregunta 72: True or False: During the Sprint Review the stakeholder's role is to reorder the Product Backlog. *(Una respuesta)*

True

False

Pregunta 73: Why is it important that there is only one Product Owner per product? (Choose three.) *(Múltiples respuestas)*

It would confuse the stakeholders if they had to work with more than one person.

It helps avoid barriers to effective communication and rapid decision-making.

It is clear who is accountable for the ultimate value of the product.

The Scrum Team always knows who determines the order of the Product Backlog.

The Scrum Master knows who acts as their backup while on vacation.

Pregunta 74: If Product Backlog refinement is needed, when is the ideal time for refinement to take place and who should participate? (Choose two.) *(Múltiples respuestas)*

The Product Owner must do this as essential work in Sprint O.

The Scrum Team on an ongoing basis, defining Product Backlog items into smaller more precise items that are ready for selection.

The Product Owner takes the time between the end of one Sprint and the start of the next Sprint to complete refinement.

Business analysts in the organization should do this work for the Scrum Team 1-2 Sprints ahead of the development Sprints.

The Scrum Team during the current Sprint, if they have been unable during preceding Sprints to define Product Backlog items with enough precision to begin work.

Pregunta 75: What is a Product Owner typically responsible for during a Sprint? (Choose two.) *(Múltiples respuestas)*

Updating the work plan for the Developers on a daily basis.

Nothing.

Creating financial reporting upon the spent hours reported by the Developers.

Working with the Scrum Team on Product Backlog refinement.

Attending every Daily Scrum to answer questions about the Sprint Backlog items.

Collaborating with stakeholders, users, and customers.

Pregunta 76: True or False: The Scrum Team is accountable for creating a valuable increment every Sprint. *(Una respuesta)*

True

False

Pregunta 77: True or False: To get started in terms of what to build, Scrum requires no more than a Product Owner with enough ideas for a first Sprint, Developers to implement those ideas, and a Scrum Master to help guide the process. *(Una respuesta)*

True

False

Pregunta 78: True or False: Dependencies could influence how the Product Owner orders Product Backlog items. *(Una respuesta)*

True

False

Pregunta 79: Who is responsible for the sizing of Product Backlog items? (Choose the best answer.) *(Una respuesta)*

The Developers after clarifying requirements with the Product Owner.

The Product Owner with input from the Developers.

The Developers, alone.

The most senior people in the organization, including architects and subject matter experts.

The Scrum Master.

Pregunta 80: Which best describes the Product Backlog? (Choose the best answer.) *(Una respuesta)*

It contains all foreseeable tasks and requirements from which the Scrum Team can develop and maintain a complete project plan.

It provides just enough information to enable a Scrum Team to start the design phase of a product.

It is allowed to grow and change as more is learned about the product and its customers.

It is baselined to follow change management processes.

Pregunta 81: Why do the Developers need a Sprint Goal? (Choose the best answer.) *(Una respuesta)*

The Developers are more focused with a common yet specific goal.

A Sprint Goal ensures that all of the Product Backlog items selected for the Sprint are implemented.

A Sprint Goal only gives purpose to Sprint 0.

Sprint Goals are not valuable. Everything is known from the Product Backlog.

Pregunta 82: A new Developer is having continuing conflicts with existing members of the Scrum Team: which is impacting the delivery of the Increment. If necessary, who is responsible for removing the Developer from the Scrum Team? (Choose the best answer.) *(Una respuesta)*

The Scrum Team is responsible

The hiring manager is responsible, they hired the Developer

The Scrum Master is responsible, they remove impediments

The Product Owner is responsible, they control the return on investment (ROI)

Pregunta 83: Who determines how many Product Backlog items the Developers select for a Sprint? (Choose the best answer.) *(Una respuesta)*

The Product Owner

The Scrum Master

The stakeholders attending Sprint Planning

The Scrum Team

The Developers

Pregunta 84: What does it mean to say that an event has a timebox? (Choose the best answer.) *(Una respuesta)*

The event must take ai least a minimum amount of time

The event can take no more than a maximum amount of time

The event must happen at a set time

The event must happen by a given time

Pregunta 85: Developers are self-managing, which of the following do they manage? (Choose the best answer.) *(Una respuesta)*

Product Backlog ordering

Sprint length

Stakeholders for the Sprint Review

Sprint Backlog

When to release based on its progress

Pregunta 86: What is the accountability of the Product Owner during Sprint 0? (Choose the best answer.) *(Una respuesta)*

There is no such thing as Sprint 0.

Gathering, eliciting, and analyzing the requirements to build the Product Backlog.

Determine the composition of the Scrum Team to meet the release plan.

Create the overall release plan to ensure that organizational goals are met.

Make sure enough Product Backlog items are refined to fill the first 3 Sprints.

Pregunta 87: Which three of the following are feedback loops in Scrum? (Choose three.) *(Múltiples respuestas)*

Daily Scrum

Release Planning

Sprint Review

Refinement Meeting

Sprint Retrospective

Pregunta 88: True or False: Multiple Scrum Teams working on the same product or system all select work from the same Product Backlog. *(Una respuesta)*

True

False

Pregunta 89: True or False: A Product Owner with multiple teams working on one product should maintain separate Product Backlogs for each team. *(Una respuesta)*

True

False

Pregunta 90: Who should make sure everyone on the Scrum Team does their tasks for the Sprint? (Choose the best answer.) *(Una respuesta)*

The Project Manager

The Product Owner

The Scrum Master

The Scrum Team

All of the above

Pregunta 91: The length of a Sprint should be: (Choose the best answer.) *(Una respuesta)*

Short enough to keep the business risk acceptable to the Product Owner.

Short enough to be able to synchronize the development work with other business events.

No more than one calendar month.

All of the above.

Pregunta 92: When is it most appropriate for a Scrum Team to change the Definition of Done? (Choose the best answer.) *(Una respuesta)*

During the Sprint Retrospective

Prior to starting a new project

During Sprint Planning

During Product Backlog refinement

Pregunta 93: Which statement best describes Scrum? (Choose the best answer.) *(Una respuesta)*

A framework to generate value through adaptive solutions for complex problems

A complete methodology that defines how to develop software

A cookbook that defines best practices for software development

A defined and predictive process that conforms to the principles of Scientific Management

Pregunta 94: True or False: A Product Owner is essentially the same thing as a traditional Project Manager. *(Una respuesta)*

True

False

Pregunta 95: You are the Scrum Master of a new, to be developed Product. Development is going to require 45 people. What is a good first question for you to suggest the group thinks about when forming into teams? (Choose the best answer.) *(Una respuesta)*

How will we make sure all teams have the right amount of expertise?

What is the right mixture of senior and junior people on each team?

Who are the subject matter experts on each team?

Who are going to be the team leads?

Pregunta 96: Why is the Daily Scrum held at the same time and same place? (Choose the best answer.) *(Una respuesta)*

The place can he named

Rooms are hard lo book and must be booked in advance

The consistency reduces complexity

The Product Owner demands it

Pregunta 97: Who has the final decision about the order of items in the Product Backlog? (Choose the best answer.) *(Una respuesta)*

The Developers

The Scrum Master

The Stakeholders

The Product Owner

The Scrum Team

Pregunta 98: The Developers ask their Product Owner to re-order the Product Backlog. The team is waiting for an external supplier to deliver a component. Without that component there will not be enough work in the next Sprint to occupy the full team. As the Scrum Master, what advice would you give the Product Owner? (Choose the best answer.) *(Una respuesta)*

Remind the Product Owner that their primary concern is the flow of value reflected in the ordering of the Product Backlog

Tell the Product Owner that the Product Backlog should be ordered to maximize utilization of the Developers

Tell the Product Owner to re-order the Product Backlog so the work involving the external component can be planned in a separate sprint

Pregunta 99: For the purpose of transparency, when does Scrum say a valuable and useful Increment must be available? (Choose the best answer.) *(Una respuesta)*

At the end of every Sprint

Before the Release Sprint

After the Acceptance Testing phase

When the Product Owner asks to create one

Every 3 Sprints

Pregunta 100: Several Sprints into a project, the Product Owner tells the Scrum Master that a key stakeholder just started using the product. The stakeholder is unhappy with the quality of the product, and the Product Owner agrees with the stakeholder's assessment that the quality is low. How should the Scrum Master respond to the Product Owner? (Choose the best answer.) *(Una respuesta)*

Tell the Product Owner they have noted the concern and will raise this issue at the Sprint Retrospective

Encourage the Product Owner to include quality specifications in the Product Backlog and to communicate the stakeholders' concerns to the Developers

Bring the concern to the testers to improve how the Product is verified

Explain to the Product Owner that it is up to the Developers to decide on acceptable quality standards

Work with the Product Owner to understand their desired resolution and help formulate an approach for raising the concern with the Developers

Pregunta 101: What is the Product Owner responsible for during the Sprint Retrospective? (Choose the best answer.) *(Una respuesta)*

The Product Owner should not take part in Sprint Retrospective

Summarizing and reporting the discussions to the stakeholders that they represent in the Scrum Team

Capturing requirements for the Product Backlog

Participating as a Scrum Team member

Pregunta 102: During the Sprint Retrospective a Scrum Team has identified several high priority process improvements. Which of the following statements is most accurate? (Choose the best answer.) *(Una respuesta)*

The Scrum Team should choose at least one high priority process improvement to place in the Product Backlog

The Scrum Team should decline to add a process improvement to the Sprint Backlog when things are running smoothly

The Scrum Team may add the items to the Sprint Backlog for the next Sprint

The Scrum Master selects the most important process improvement and places it in the Sprint Backlog

Pregunta 103: During a Sprint Retrospective, the Developers propose moving the Daily Scrum to only occur, on Tuesdays and Thursdays. Which two are the most appropriate responses for the Scrum Master to recommend? (Choose two.) *(Múltiples respuestas)*

Consider the request and decide on which days the Daily Scrum should occur

Have the Developers vote.

Acknowledge and support the self-managing team's decision.

Learn why the Developers want this and work with them to improve the outcome of the Daily Scrum

Coach the team on why the Daily Scrum is important as an opportunity to update the plan

Pregunta 104: What should the Scrum Master keep in mind when deciding what to do about the complaint from the Developers? (Choose two.) *(Múltiples respuestas)*

The benefit of allowing the Developers to identify a solution for themselves

The desire to maintain a stable velocity

The ability of the Scrum Teams to produce integrated Increments

The need to have enough work to keep all Developers busy

Pregunta 105: When does a Sprint conclude? (Choose the best answer.) *(Una respuesta)*

When the Product Owner decides enough has been delivered to meet the Sprint Goal

When the Sprint Retrospective is complete

When all the tasks are completed by the Developers

When all Product Backlog items meet their Definition of Done

Pregunta 106: When does a Developer become accountable for the value of a Product Backlog item selected for the Sprint? (Choose the best answer.) *(Una respuesta)*

Whenever a team member can accommodate more work

During the Daily Scrum

At the Sprint Planning Event

Never. The entire Scrum Team is accountable for creating value every Sprint

Pregunta 107: Which of the following might the Scrum Team discuss during a Sprint Retrospective? (Choose the best answer.) *(Una respuesta)*

Methods of communication

The way the Scrum Team does Sprint Planning

Skills needed to improve the Developers ability to deliver

The Definition of Done

All of the above

Pregunta 108: How much work is required of the Developers to complete a Product Backlog item selected during the Sprint Planning? (Choose the best answer.) *(Una respuesta)*

As much as is required to meet the Scrum Team's Definition of Done

A proportional amount of time on analysis, design, development and testing

As much as they can fit into the Sprint, with remaining work deferred to the next Sprint

All development work and at least some testing

Pregunta 109: Who determines how work is performed during the Sprint? (Choose the best answer.) *(Una respuesta)*

Team manager

The Scrum Team

The Developers

The Scrum Master

Subject matter experts

Pregunta 110: During a Sprint, when is new work or further decomposition of work added to the Sprint Backlog? (Choose the best answer.) *(Una respuesta)*

When the Scrum Master has time to enter it

As soon as possible after it is identified

When the Product Owner identifies new work

During the Daily Scrum after the Developers approve it.

Pregunta 111: Who determines when it is appropriate to update the Sprint Backlog during a Sprint? (Choose the best answer.) *(Una respuesta)*

The Scrum Team

The Product Owner.

The Developers

The Project Manager

Pregunta 112: What is the timebox for the Sprint Planning event? (Choose the best answer.) *(Una respuesta)*

Whenever it is done

4 hours for a one-month Sprint

8 hours for a one-month Sprint

Monthly

Pregunta 113: Which three of the following are true about Scrum? (Choose three.) *(Múltiples respuestas)*

Scrum is based on empiricism and lean thinking

Scrum is a methodology where you can pick and choose which parts of Scrum you think will work for your environment

Scrum is a framework for developing and sustaining complex products

Each component of Scrum serves a specific purpose and is essential to Scrum's success and your usage of Scrum to develop complex products

Scrum implements self-management by replacing Project Managers with Scrum Masters

Pregunta 114: When should a Sprint Goal be created? (Choose the best answer.) *(Una respuesta)*

A Sprint Goal is not mandatory in Scrum.

It should have been created in the previous Sprint during Product Backlog refinement

It must be established before Sprint Planning in order to begin planning

During Sprint Planning.

At any time during the Sprint

Pregunta 115: Which of the following is required by Scrum? (Choose the best answer.) *(Una respuesta)*

Sprint Retrospective

Developers must stand up at the Daily Scrum

Sprint Burndown Chart

Release Planning

All of the above

Pregunta 116: You have just been hired by a company new to Scrum. Your management has assigned you to be the Scrum Master of six new Scrum Teams. These teams will build one product. Select two conditions you should strive for in this scenario. (Choose two.) *(Múltiples respuestas)*

There should be six Product Owners, one for each Scrum Team

There should be six Product Owners, reporting to a Chief Product Owner

The product has one Product Backlog

Each Scrum Team should have a separate Product Backlog

There should be only one Product Owner

Pregunta 117: When does a Developer become accountable for an item in the Sprint Backlog? (Choose the best answer.) *(Una respuesta)*

As soon as a Developer on the Scrum Team can accommodate more work

At Sprint Planning when all of the Sprint Backlog items are split evenly across the Developers

During the Daily Scrum

Never. All Developers on the Scrum Team share accountability for items in the Sprint Backlog

Pregunta 118: A Scrum Team is required to deliver a done Increment by the end of a Sprint. Select two statements that explain what done means. (Choose two.) *(Múltiples respuestas)*

No work is left to meet the Definition of Done

Whatever the Product Owner defines as quality

Ready for integration

All work the Developers are willing to do

Ready to be released to end users

Pregunta 119: How is management that is external to the Scrum Team involved in the Daily Scrum? (Choose the best answer.) *(Una respuesta)*

The Product Owner represents their opinions

Managers are not required at the Daily Scrum

The Scrum Master speaks on their behalf

Management gives an update at the start of each Daily Scrum

Pregunta 120: A Sprint Retrospective should be held: (Choose the best answer.) *(Una respuesta)*

At the end of each Sprint.

At the end of the last Sprint in a project or a release.

At the beginning of each Sprint.

Only when the Scrum Team determines it needs one.

Pregunta 121: Which of the following are true about the Product Owner? (Choose the best answer.) *(Múltiples respuestas)*

The Product Owner can be represented by a committee or a team of people.

The Scrum Team can have multiple Product Owners.

The Product Owner is one person.

The Product Owner is accountable for ordering the Product Backlog.

Pregunta 122: The Scrum Team should have all the skills needed to: (Choose the best answer.) *(Una respuesta)*

Turn Product Backlog items into a valuable, useful Increment.

Complete the project within the date and cost as calculated by the Product Owner.

Do all of the development work, except for specialized testing that requires additional tools and environments.

Pregunta 123: Which of the following are criteria to order Product Backlog items? (Choose three.) *(Múltiples respuestas)*

The availability of the Scrum Master.

The value of the Product Backlog items.

Their relevance to achieving the Product Goal.

The number of stakeholders who approve of the item

Dependencies between Product Backlog items.

Pregunta 124: Which of the following is an accountability of a Tester on a Scrum Team? (Choose the best answer.) *(Una respuesta)*

Scrum has no Tester accountability. The Developers are accountable for quality.

Tracking defect rates to ensure they improve each Sprint.

Executing tests, finding defects, and reporting them to the Developers.

Refreshing and communicating the Definition of Done to the Product Owner.

Verifying the work of the Developers.

Pregunta 125: What are the two primary ways a Scrum Master helps a Scrum Team work at its highest level of productivity? (Choose two.) *(Múltiples respuestas)*

By keeping high value features high in the Product Backlog.

By ensuring the meetings start and end at the proper time.

By removing impediments that hinder the Scrum Team.

By facilitating Scrum Team decisions.

Pregunta 126: The timebox for a Daily Scrum is? (Choose the best answer.) *(Una respuesta)*

15 minutes.

The same time of day every day.

4 hours.

Two minutes per person.

Pregunta 127: True or False: The Sprint Backlog is a result of Sprint Planning, and it includes the Sprint Goal. *(Una respuesta)*

True

False

Pregunta 128: An organization has decided to adopt Scrum, but management wants to change the terminology to fit with terminology already used. What will likely happen if this is done? (Choose the best answer.) *(Una respuesta)*

Without a new vocabulary as a reminder of the change, very little change may actually happen.

The organization may not understand what has changed within Scrum and the benefits of Scrum may be lost.

Management may feel less anxious.

All answers apply.

Pregunta 129: The IT manager asks a Scrum Team for a status report describing the progress throughout the Sprint. The Scrum Team asks the Scrum Master for advice. The Scrum Master should: (Choose the best answer.) *(Una respuesta)*

Tell the Developers to fit the report into the Sprint Backlog.

Talk to the IT manager and explain that progress in Scrum comes from inspecting an Increment at the Sprint Review.

Ask the Product Owner to send the manager the report.

Create and deliver the report to the manager herself.

Tell the Scrum Team to figure it out themselves.

Pregunta 130: As the Developers start work during the Sprint, they realize they have selected too much work to finish in the Sprint. What should they do? (Choose the best answer.) *(Una respuesta)*

As soon as possible in the Sprint, work with the Product Owner to remove some work or Product Backlog items.

Reduce the Definition of Done and get all of the Product Backlog items done by the new definition.

Find another Scrum Team to give the excess work to.

Inform the Product Owner at the Sprint Review, but prior to the demonstration.

Pregunta 131: Who is accountable for clearly expressing Product Backlog items? (Choose the best answer.) *(Una respuesta)*

The business analyst who represents the Product Owner.

The Scrum Master.

The Scrum Master, or the Scrum Master may have the Developers do it.

The Product Owner.

Pregunta 132: What action should the Scrum Master take? (Choose the best answer.) *(Una respuesta)*

Inform management and ask them to solve it.

Ask the Developers to alternate who is responsible for meeting setup.

Allow the Developers to self-manage and determine for themselves what to do.

Set up the meeting and tell the Scrum Team that is how it will be done.

Pregunta 133: What are two effective ways for the Scrum Team to make non-functional requirements visible? (Choose two.) *(Múltiples respuestas)*

Add them to the Definition of Done so the work is taken care of every Sprint.

Add them to the Product Backlog to ensure transparency.

Put them on a separate list on the Scrum board, available for all to see.

Run the integration and regression tests before the end of the Sprint, and capture the open work for the Sprint Backlog of the next Sprint.

Pregunta 134: Who is accountable for tracking the remaining work toward the Sprint Goal? (Choose the best answer.) *(Una respuesta)*

The Product Owner.

The Scrum Master.

The Project Manager.

The Developers

Pregunta 135: What may be included in the Sprint Backlog? (Choose the best answer.) *(Una respuesta)*

User Stories.

Tasks.

Use Cases.

Tests.

Any of the above (or others) which are a decomposition of the selected Product Backlog items.

Pregunta 136: What activities would a Product Owner typically undertake in the period between the end of the current Sprint and the start of the next Sprint? (Choose the best answer.) *(Una respuesta)*

There are no such activities. The next Sprint starts immediately after the current Sprint.

Refine the Product Backlog.

Work with the Quality Assurance departments on the Increment of the current Sprint.

Update the project plan with stakeholders.

Pregunta 137: Who does the work to make sure Product Backlog items conform to the Definition of Done? (Choose the best answer.) *(Una respuesta)*

The Scrum Team.

The Quality Assurance Team.

The Developers

The Product Owner.

The Scrum Master.

Pregunta 138: What are two effective ways for a Scrum Team to ensure security concerns are satisfied? (Choose the best two answers.) *(Múltiples respuestas)*

Have the Scrum Team create Product Backlog items for each concern.

Delegate the work to the security department.

Add a Sprint to specifically resolve all security concerns.

Add security concerns to the Definition of Done.

Postpone the work until a specialist can perform a security audit and create a list of security-related Product Backlog items.

Pregunta 139: Scrum requires that the Product Owner must use which of the following techniques? (Choose the best answer.) *(Una respuesta)*

There is no required technique.

Burndown chart.

Critical Path Analysis.

Feature burn-up.

Pregunta 140: Who is responsible for the Sprint Backlog? (Choose the best answer.) *(Una respuesta)*

The Scrum Master.

The Scrum Team.

The Product Owner.

The Developers.

Pregunta 141: When does the next Sprint begin? (Choose the best answer.) *(Una respuesta)*

When the Product Owner is ready.

The Monday following the Sprint Review.

Immediately following the next Sprint Planning.

Immediately after the conclusion of the previous Sprint.

Pregunta 142: True or False: Multiple Scrum Teams working on the same product must have the same Sprint start date. *(Una respuesta)*

True

False

Pregunta 143: Which approach is best for Scrum Teams in order to produce valuable Increments? (Choose the best answer.) *(Una respuesta)*

Each Scrum Team is accountable for developing functionality from beginning to end.

Each Developer works on the component where they feel that they can contribute.

Each Scrum Team works on an independent set of components.

Each Scrum Member works only as an independent layer of the system.

Pregunta 144: True or False: A high-performance Scrum Team ensures that each Increment is complete by running a Release Sprint. *(Una respuesta)*

True

False

Pregunta 145: True or False: Scrum has a role called "Project Manager". *(Una respuesta)*

True

False

Pregunta 146: What is the typical size for a Scrum Team? (Choose the best answer.) *(Una respuesta)*

9.

7 plus or minus 3.

10 or fewer.

At least 7.

Pregunta 147: Who is on the Scrum Team? (Choose three.) *(Múltiples respuestas)*

Product Owner.

Project Manager.

Developers.

Scrum Master.

Stakeholders.

Pregunta 148: As the Sprint Planning progresses, the Developers realize that the workload may be greater than their capacity to complete the work. Which two are valid actions? (Choose two.) *(Múltiples respuestas)*

The Developers ensure that the Scrum Team is aware, start the Sprint, and monitor progress.

Cancel the Sprint.

The Developers work overtime during this Sprint.

Remove or change selected Product Backlog items.

Recruit additional Developers before the work can begin.

Pregunta 149: Which of the following are true about the length of the Sprint? (Choose the best answer.) *(Una respuesta)*

The length of the Sprint should be proportional to the work that is done in between Sprints.

Sprint length is determined during Sprint Planning, and should be long enough to make sure the Scrum Team can deliver what is to be accomplished in the upcoming Sprint

Sprint length is determined during Sprint Planning, and should hold the time it will take to build the planned features in the upcoming Sprint, but does not include time for any testing.

All Sprints must be one month or less.

Pregunta 150: Who must attend the Daily Scrum? (Choose the best answer.) *(Una respuesta)*

The Developers and Product Owner.

The Scrum Master and Product Owner.

The Developers and Scrum Master.

The Scrum Team.

The Developers.

Pregunta 151: True or False: A Scrum Master fulfills the same role as a traditional Project Manager. *(Una respuesta)*

True

False

Pregunta 152: The Scrum Master observes the Product Owner struggling with ordering the Product Backlog. What is an appropriate action for the Scrum Master to take? (Choose the best answer.) *(Una respuesta)*

Encourage the Product Owner to work with the Developers to see which items technically are fastest to implement.

Suggest the Product Owner extend the Sprint, so he can have more time to order the Product Backlog.

Offer the Product Owner help in understanding that the goal of ordering the Product Backlog is to maximize value.

Present the Product Owner with an ordered Product Backlog to use.

Suggest that the Developers order the Product Backlog to be sure that it is a feasible ordering of work.

Pregunta 153: Who creates the Definition of Done? (Choose the best answer.) *(Una respuesta)*

The Scrum Master

The Product Owner

The Scrum Team

The Developers

Pregunta 154: Which answer best describes the topics covered in Sprint Planning? (Choose the best answer.) *(Una respuesta)*

What can be done, how to do it, and why to do it.

How conditions have changed and how the Product Backlog should evolve.

Who is on the team and what team member roles will be.

What went wrong in the last Sprint and what to do differently this Sprint.

What to do and who will do it.

Pregunta 155: How often should Scrum Team membership change? (Choose the best answer.) *(Una respuesta)*

As needed, while taking into account a short-term reduction in productivity.

Every Sprint to promote shared leaning.

As needed, with no special allowance for changes in productivity.

Never, it reduces productivity.

Pregunta 156: True or False: Every Scrum Team must have a Product Owner and Scrum Master. *(Una respuesta)*

False. A Scrum Master is only required when asked for by the Scrum Team.

True. Each must be 100% dedicated to the Scrum Team.

False. A Product Owner can be replaced by a subject matter expert in the Scrum Team.

True. Outcomes are affected by their participation and availability.

Pregunta 157: At the end of a Sprint, a Product Backlog item worked on during the Sprint does not meet the Definition of Done. What two things should happen with the undone Product Backlog item? (Choose the best two answers.) *(Múltiples respuestas)*

Review the item, add the done part of the estimate to the velocity and create a Story for the remaining work.

If the stakeholders agree, the Product Owner can accept it and release it to the users.

Do not include the item in the Increment this Sprint.

Put it on the Product Backlog for the Product Owner to decide what to do with it.

Pregunta 158: Who can cancel a Sprint? (Choose the best answer.) *(Una respuesta)*

The Product Owner.

The Scrum Team.

The Stakeholders.

The Scrum Master

Pregunta 159: A Scrum Team is a cohesive unit of professionals that consists of which of the following? (Choose three.) *(Múltiples respuestas)*

One Product Owner.

One Scrum Master.

Users.

Customers.

Developers.
